INTRODUCTION

iTakeout Ltd is a new Internet based company providing a **quick and easy method to sell your food online**. We aim to provide you with a simple, stylish, and secure method of selling and advertising your takeaway restaurant online.

THE INTERNET

The internet is proving to be a popular choice for retail outlets because it allows customers to shop from the comfort of their own home. iTakeout.co.uk aims to bring the internet into the world of takeout food. Dominos Pizza currently sell one in seven of their pizzas online. In a world of stiff competition the internet can give your business an edge in the highly competitive market of takeout food.

STUDENTS

Almost every student has internet access in their own room and spend large chunks of time surfing the web. Halls of residents, where a large proportion of students live can be a difficult place to reach with regular takeout advertising. By using the internet you are taking your restaurant directly to the lives of the students.
